p. 269-272.

DISCUSSIONS: Drugs, "Antiarrhythmic" Therapy,
Pathology, Heart, Rhythm, Allergy, Corticosteroids

Synthetic antiarrhythmics were used successfully in 5
cases of disturbance of cardiac rhythm (5 with auric-
ular fibrillation, 1 with flutter, 2 with paroxysmal
tachycardia). These patients had no other cardiac or
circulatory disturbances, but sometimes an allergic
history or signs of liver or intestinal insufficiency.

I. Gross, F.

Trans. of Deutsche Gesellschaft für Kreislauf-
forschung. Verhandlungen (West Germany) 1962,
v. 28, p. 11-26.

DESCRIPTIONS: *Hormones, Etiology, *Hypertension.

In human essential hypertension there is no absolute over-production of one or several known hormones, which can be made responsible for the rise in pressure. The excessive production of aldosterone observed in malignant hypertension should be viewed as a consequence and not the cause of cardiovascular damage. The hypertension produced by endogenous overproduction of adrenocortical hormones must be considered (Biological Sciences--Pathology, TT, v. 10, no. 12) (over)
